

M2M One Global SIM Pricing

How does it work?

With group data plans every SIM on the same plan contributes its data to create an effective "pool" of data across your fleet - for example 4 x 5MB SIM cards gives you a pool of 20MB.

Each additional zone allows inter-zone pooling of data - for example a Zone 3 plan allows usage in zone 1, 2 & 3 whereas a Zone 1 plan only allows for usage in Zone 1 and all other zones are billed as excess data.

M2M One Global SIM Plans	Price per SIM per Month (Volume Discount is based on Active Services) All pricing is in Australian Dollars (\$AUD) and EX-GST						
	Pooled Data Contribution per SIM per Month	1 - 99 Services	100 - 249 Services	250 - 499 Services	500 - 999 Services	1000+ Services	Excess Usage Per MB
