

Take your IoT Devices Worldwide with the M2M One Global SIM

The M2M One Global SIM empowers customers deploying IoT devices worldwide by offering access to multiple networks in over 100 countries simplified through a single SIM card and management portal.

Why go global with M2M One?

Powerful SIM Management - M2M One combine a team of trained customer service managers experienced in identifying excess usage and preventing bill shock with the worlds leading SIM management portal (CISCO Jasper) to help reduce the risks associated with roaming charges.

Single SIM, Multiple Networks - Gain best coverage overseas with access to multiple networks in a single country through one SIM card. No need to manage multiple SKUs, data pools or APNs.

Roaming Pricing Simplified - With M2M One's simple roaming plans you no longer need to worry about 'pricing zones'. M2M One have done the hard work for you, simply pick and a plan and pool data across your entire fleet on any available carrier anywhere in the world.

Advanced Networking - M2M One can now offer our industry leading custom networking options for global SIM cards with Static IP allocation, private subnets and IPSEC VPN tunnels.

M2M One Global SIM - Group Data Plans (Flexible Pool)

20MB POOL

With group data plans every active SIM on the same rate plan contributes its data allowance to create a "pool" of data across your SIM fleet - For example 4 x 5MB SIM cards gives you a pool of 20MB.

(Note: SIM Cards do not pool across different rate plans)

If you exceed the limit of the pool you can move to a larger plan at any point in the calendar month.

M2M One IPX - Your own private IP range on the M2M One Network.

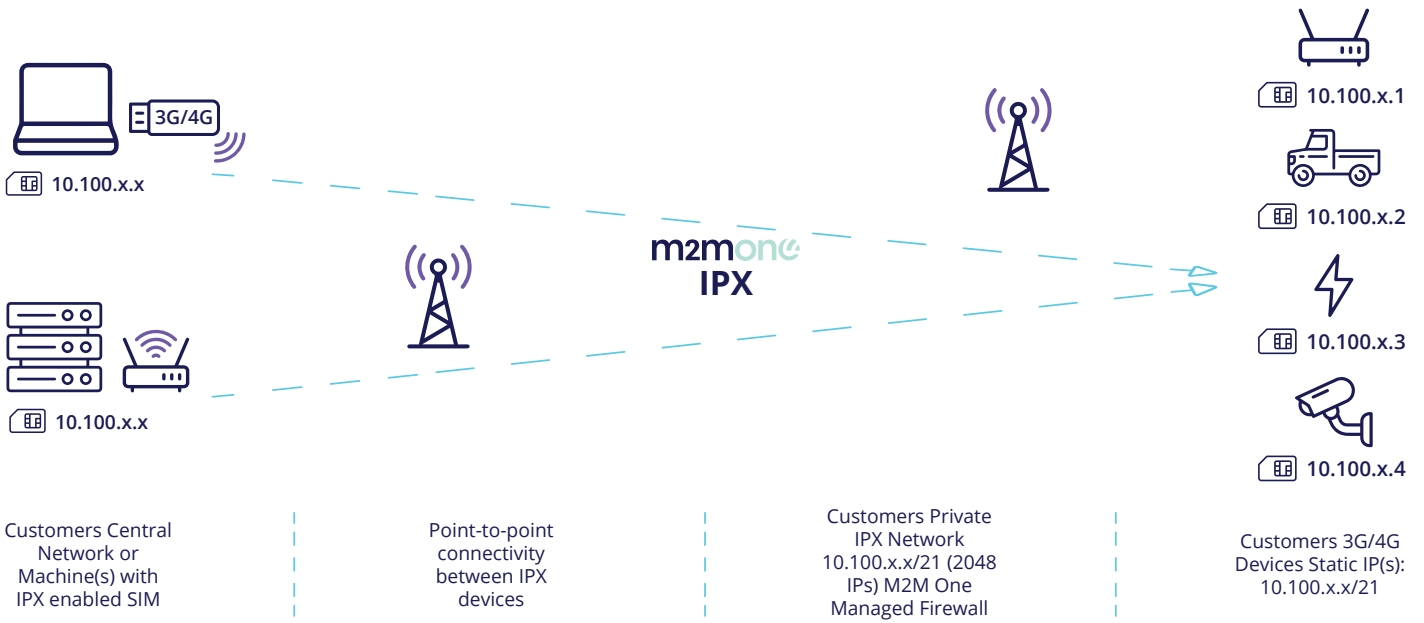

M2M One IPX gives you your own private IP subnet on our private APN. This allows direct access to devices in the field using a unique static IP address.

The IP Addresses allocated to your devices using IPX are private, and access to them from the public internet is prohibited by strict firewall rules. Making IPX a robust and secure network for sensitive data.

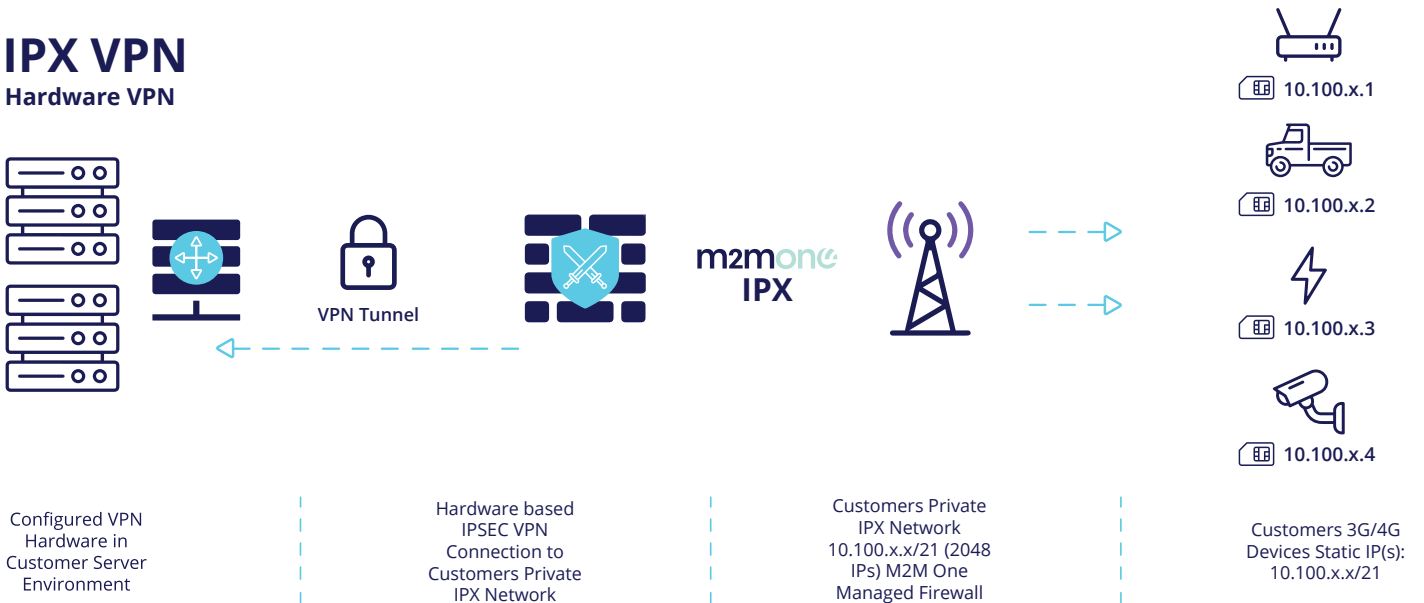

To communicate with your IPX devices you will need to use point-to-point between devices on your IPX Network or by using an IPSEC VPN.

M2M/IoT IP Networking

M2M One SIM Cards can be configured with private IP Networking solutions for secure and efficient IoT traffic management.
